Side image: `sideimageframe`

- The image fills the space from the title bar to the footer, flush with the right edge
- Footnotes and sources move into a rotated strip beside it[£]
- **`\sidefootnotes`** does the same for any other frame

```
\begin{sideimageframe}{Side image: ...}
    {media/illustration-slide-stack-portrait.pdf}
  \begin{itemize}
    \item ...\footnote{...}
  \end{itemize}
\end{sideimageframe}

% rotated footnotes on any other frame:
\sidefootnotes
\begin{standardframe}{Title}
```
